

Banking Information System - README

Project Overview

The Banking Information System is a Java-based application developed to simulate basic banking operations. It provides a simple and user-friendly interface for managing customer accounts and performing banking transactions.

Features

- Create a new bank account
- Deposit money
- Withdraw money
- Check account balance
- Display customer details
- Menu-driven console application
- Input validation for basic operations

Technologies Used

Technology
Java
Object-Oriented Programming (OOP)
Scanner Class
Collections (if applicable)

Project Structure

```
BankingInformationSystem/  
  Main.java  
  BankAccount.java  
  Customer.java  
  README.md
```

How to Run

1. Install Java JDK (Version 8 or above).
2. Compile the Java files: `javac *.java`
3. Run the application: `java Main`

Learning Outcomes

- Understanding Java fundamentals
- Applying Object-Oriented Programming concepts
- Working with user input and console applications
- Implementing basic banking operations
- Improving problem-solving and programming skills

Future Enhancements

- Database integration (MySQL)
- Graphical User Interface (GUI)
- Online banking features
- Secure login authentication
- Transaction history
