

INTERNSHIP REPORT

Title: Internship Report

Name: Mutakani Kalyani

Course: B.Tech

Branch: Electronics and Communication Engineering (ECE)

Acknowledgement

I sincerely express my gratitude to the management and mentors of the organization for providing me with the opportunity to complete my internship successfully. The internship provided practical exposure to real-world applications of programming and software development. During the internship, I learned Java programming concepts, object-oriented programming, exception handling, file handling, collections, and basic database connectivity. I implemented several programs and mini-projects to strengthen my coding and problem-solving skills. This internship enhanced my technical knowledge, communication skills, teamwork, and confidence in software development.

Objectives

- Understand software development fundamentals.
- Improve Java programming skills.
- Learn OOP concepts.
- Develop problem-solving abilities.
- Gain practical experience.

Technologies Used

Java, Eclipse/IntelliJ IDEA, JDK, Git & GitHub, MySQL (Basic), Microsoft Office.

Learning Outcomes

Java Basics, Variables, Operators, Loops, Arrays, Strings, Methods, OOP, Constructors, Inheritance, Polymorphism, Abstraction, Encapsulation, Exception Handling, File Handling, Collections, JDBC Basics, Debugging.

Project: Banking Information System

A Java-based application to create accounts, deposit, withdraw, check balances, and manage customer information.

Skills Developed

Technical: Java, OOP, Problem Solving, Debugging, GitHub, Database Basics.

Soft: Communication, Teamwork, Time Management, Presentation, Analytical Thinking, Self Learning.

Challenges & Solutions

Faced advanced Java concepts, debugging, GitHub management; resolved through daily practice, documentation, mentor guidance, and coding exercises.

Conclusion

The internship strengthened my programming knowledge, practical software development skills, and confidence for future career opportunities.
